Vertical Smart Probe

VSP-7005

The form factor of the VSP-7005 Vertical Smart Probe is the first thing you notice, but the unique shape is not about distinct looks; it's about distinct advantages. Especially configured for automated scanning systems and non-handheld installations, the VSP-7005 provides flexible options to support the most efficient workflow, and the backside of the device is perfectly flat for flush permanent mounting solutions.

The VSP-7005 is designed for reading and programming BMDS IPT and IPTT transponders. Reading takes place primarily from the bottom flat side of the unit, which provides maximum scan field strength for maximum convenience and easy accurate scans. Three LEDs provide status indication, and if desired, you can defeat the standard confidence beep signal indicating a complete scan, and work without audio confirmation.

Onboard the robust VSP-7005 Vertical Smart Probe, a fully programmable microprocessor allows; use of various data modifiers such as mapping tables, location indication, and non-duplicated read controls, as well as upgrades, and new features as developed for special applications. The unit uses a standard Smart Probe cable connection, and because all outgoing signals are decoded and converted to a digital format before leaving the scanner, long cable runs are possible. Connecting the VSP-7005 Vertical Smart Probe to any of the various BMDS DAS readers provides power, data storage, data viewing, and interface with peripheral devices and personal computers.

The VSP-7005 is intended for use with the DAS-6001, 6003, 6008, 6010, 7010, and 8001 systems

VSP 7005

- Automated fixed position scanning
- For IPT/IPTT Transponders Only
- Maximized Scan Field Strength
- Flexible Mounting Options
- Standard Smart Probe Connection

SPECIFICATIONS FOR VSP 7005

Specifics

Over-all Size	3.07" wide by 6.3" High by 2.9" Long
Weight	7.80 oz
Materials	Durable molded plastic

Companion Configurations

DAS-8001
DAS-6003
DAS-6008
DAS-7010

*Other configurations possible

Transponder Compatibility

IPT-300 | VSP-7005
IPTT-300 | VSP-7005

A unique Smart Probe to meet your objectives for data collection

Especially configured for automated and non-handheld installation, the VSP-7005 is designed for use with DAS reader-programmers, including the DAS-8001, 6003, 6008, and 7010 systems.

The reader-programmers collect transponder data from the VSP-7005, organize it within a database format, and shares this data with a broad range of personal computers and digital devices.
