DAS 7006/7 S

Wireless Handheld Reader

Combining our most desirable and most advanced features, the DAS-7006/7 S Handheld Reader with Wireless Communications is compact, convenient and cost effective. This three-component system includes the Smart Probe wand for reading BMDS transponders, a powered stand for recharging the unit's battery, and a small wireless communications module for transferring data to and from the handheld scanner.

Each wireless communication module provides two way data transfer to and from one specific lightweight Smart Probe, converting data to one of two output formats: Serial USB, and Keyboard USB. Enhancing workflow flexibility, this unique communication module may be moved away from the charging stand to remote locations, such as near a computer or separate DAS unit; it does not require a separate power supply, instead drawing power directly from the connected device.

The super-bright scrollable 12-character LED display makes data easy-to-read in almost any lighting. A built in clock provides time and date stamping for stored or transmitted data. Fully accessible menus make custom configuration quick and easy; change data delimiters, select sound-vibration indicators, and control scanning modes according to personal preference. An advanced rechargeable lithium-ion microprocessor controlled battery provides dependable long-lasting power, and for convenient hands-free use, the scanner remains fully functional while docked vertically in the recharging stand. Recharging is fully automatic.

Use the DAS-7006 R with the IMI transponders; the DAS-7007 R with both the IPTT and IPT.

As an option use the DAS-7006/7 R with the DAS-6001, 6003, 6008, 6010, 7010, 8001 systems.

DAS 7006/7 S

- Battery 2000 mAh Lithium-Ion rechargeable
- 3 outputs: USB serial, USB keyboard and Smart Probe
- Locked communication link / over 100-ft around corners
- Scan in two convenient modes.
- Integration of RFID data.

SPECIFICATIONS FOR DAS 7006/7 R

Specifics

Over-all Size	3" wide by 2" High by 10" Long
Weight	.7 lbs Pounds
Materials	Durable molded plastic

Companion Configurations

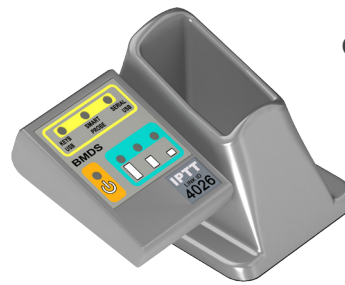

DAS-8001
DAS-6008
DAS-6010
DAS-7010

Transponder Compatibility

IMI-500 | DAS-7006
IMI-1000 | DAS-7006
IPT-300 | DAS-7007
IPTT-300 | DAS-7007

*Other configurations possible

Charging Base Station
